

# Maths Challenge

---

Pupils at Sittingbourne Community College stretched their maths skills to the limit at the Secondary Maths Challenge, at Invicta Grammar School in Maidstone. The teams competed against each other by completing four different mathematical challenges including problem solving and the famous 'Maths Relay.' It a challenge not for the faint-hearted; it takes 3 hours!

The Invicta Maths Challenge is an annual event held to celebrate maths achievement across schools in Kent.

The challenge focuses on problem solving skills and the pupils work as a team to solve them.

"The event was really important because it exposed the pupils to maths in a fun and competitive environment," explains Miss Natalie Jones. "The day was also based around problem solving which is crucial in the new 9-1 maths curriculum."

The student competitors from SCC were: Logan Marsden, Graciella Tickner, Morgan Fleming, Eddie Smith, Abbie Guscott, Meg Dabbs, Shay Anderson and Jake Owen. (All Year 10)
